

Aerial Work Platforms

Aerial Work Platforms - There are lots of accessories designed for lift trucks that can be utilized to be able to help expand the capabilities of your forklift and allow you to pick up stuff, handle materials with greater ease or to finish clean-up jobs.

Some accessories were specifically utilized for the blades themselves. For instance, blade extensions are used whenever you need more fork length, that increases lifting capacity. Fork extensions come in lengths ranging from 48-120 inches. Rounded or triangular accessories are one more kind utilized if moving rolled material in order to make sure it does not roll off of the standard flat blades.

Examples of lifting attachments comprise pivoting and telescoping crane or boom attachments. They can come in quite a few different styles and are most often utilized for transporting lumber, poles, metal bars and other kinds of bulky items. Other accessories like different styles of hooks and hook plates are existing so as to lift things utilizing a chain or sling. Magnetic lifters and slab lifters are other stuff that could be used with hook accessories. Slab lifters are specialized attachments that are utilized for picking up different materials which are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools which connect to your lift truck to be able to make moving rolls of carpet much easier. The attachment connects onto the forklift's blades and has a pole which goes through the middle of the carpet roll.

There are many types of lift truck accessory designed for facility maintenance like for instance snow blades. These industrial blades can be attached to front end loaders and designed for transferring materials like for instance mulch, snow as well as dirt. Other common cleanup accessories consist of magnetic sweepers and standard sweepers. Standard sweepers comprise a broom which the lift truck blades hook onto for sweeping big spaces like for instance warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up fast and simple.

Material spreaders are other attachments used on forklifts. These spreaders are useful for a range of applications like for instance spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting accessory which a lot of businesses use daily. The platforms range in size from 36" x 36" to up to 60" x 60". There are some models available that are capable of folding up and storing into a smaller space. Work platforms are designed to raise personnel up to an overhead location making use of the forklift. Larger platform models have added space for personnel so as to bring tools and other essential objects for the job. Often work platforms are made of poly material or steel.
