

Advance-Nilfisk Part

Advance-Nilfisk Parts - Imagine how long and tiresome it will really be to clean-up after a party, with no help from machines. Previously, the dust from carpets and upholstery had to be beat out of them by hand; cleaning cloths, brooms, and brushes were the leading cleaning products during that time.

The founder of Nilfisk-Advance, P.A. Fisker, started as an electrical engineer who really liked to work on electrical motors. After founding his company during the year 1906, he began to produce motors to drive coffee grinders, fans, machine tools and drills. Mr. Fisker's vision from the start was to have an international company marketing merchandise internationally.

The Nilfisk C1 was a revolutionary breakthrough in the cleaning industry. Mr. Fisker invented a incredible, ground breaking vacuum cleaner that could be operated by a single individual as it only weighed 17.5 kilos! This invention came in a time where many cleaning machines were very big and required at least 4 operators, therefore, the Nilfisk C1 changed everything and developed the way we clean forever. The genius behind these very first cleaning equipment remains unparalleled. Cleaning equipment offer an excellent solution to an ongoing problem; things get filthy and must be cleaned on a regular basis, without a lot of effort.

Gradually, the business Nilfisk-Advance grew all through the years. During the early 1980's the business developed more rapidly when the company became a part of the NKT Group. With new owners on board, they concentrated on driving Nilfisk-Advance forward within the trade, aspiring to be an active global player in manufacturing professional cleaning equipment. Nilfisk-Advance is now represented in all parts of the world by steadily obtaining many smaller companies in order to develop their product range and presence in new markets. They are proud to provide different cleaning solutions to suit each need.
